

Questionnaire

CCMP BAD WORD QUESTIONS :

1. Question: Who would fail to understand the importance of effective cyber security crisis management?
2. Question: What would it be if the outlined timeline in a Cyber Crisis Management Plan is not followed punctually?
3. Question: How is an incident that compromises information security described?
4. Question: What is one reason attackers might prefer PDF exploitation over browser-specific attacks?
5. Question: How can legitimate websites become sources of web-based attacks?

CCMP DOC :

1. Summarise the document.
2. What factors should be considered while preparing a CCMP for an organization?
3. What differentiates a cyber-security event from a cyber-security incident?
4. What are “watering hole” attacks, and how do they target organizations?
5. How do covert communication channels in malware enhance the effectiveness of attacks?

DLP BAD WORDS :

1. What are the top 10 points to be taken care of as a part of the DLP Policy.
2. Summarise the DLP Policy Doc in bullet wise points.

DLP NORMAL :

1. How does the DLP policy ensure compliance with data security regulations and standards?
2. Why is access to DLP events restricted, and who is allowed access?
3. What actions should employees take if they find a system or process non-compliant with the DLP policy?
